# Money Math

## 2. Working out the Change **B**

To find  
the change:

**First find out how much your purchases cost**  
**Write down the amount you pass to the cashier**

Subtract the cost of the purchase  
and there's your change!

1. Tom buys a book for that costs \$12.95. He pays with \$20. What is his change?

2. Annie buys a board game for \$12.78. She pays with \$20. How much change does she get?

3. You buy a baked potato from a street vendor for \$4.75. What is your change from \$10?

4. A kazoo costs \$7.99. If you buy two kazoos and pay with \$20, how much is the change?

5. Robin has \$14.35 and Will has \$16.28. They want a game that costs \$45. How much more money do they need?

6. Jack buys 3 boxes of chocolates for \$7.95 each. He pays with \$30. How much is the change?

7. Harry buys 2 notebooks for \$5.85 each. What is his change from \$20?

8. Peter buys 2 calculators. Each costs \$19.97. How much is the change from \$50?
