

Fractions

Name: _____

Date: _____

NOW TRY THESE!

1. Make Equivalent Fractions B

Example: $\frac{4}{5} \rightarrow$ Use single factor to multiply up numerator & denominator $\rightarrow \frac{4}{5} \overset{\times 2}{=} \frac{8}{10}$

Use factor of **2**

1. $\frac{1}{3} \overset{\times 2}{=} \frac{\quad}{\quad}$

2. $\frac{2}{10} \overset{\quad}{=} \frac{\quad}{\quad}$

3. $\frac{4}{5} = \frac{\quad}{\quad}$

4. $\frac{3}{4} = \frac{\quad}{\quad}$

Use factor of **3**

5. $\frac{1}{2} \overset{\quad}{=} \frac{\quad}{\quad}$

6. $\frac{2}{3} = \frac{\quad}{\quad}$

7. $\frac{4}{7} = \frac{\quad}{\quad}$

8. $\frac{5}{10} = \frac{\quad}{\quad}$

Use factor of **5**

9. $\frac{1}{4} \overset{\quad}{=} \frac{\quad}{\quad}$

10. $\frac{6}{8} = \frac{\quad}{\quad}$

11. $\frac{2}{5} = \frac{\quad}{\quad}$

12. $\frac{3}{7} = \frac{\quad}{\quad}$

Use factor of **4**

13. $\frac{2}{5} \overset{\quad}{=} \frac{\quad}{\quad}$

14. $\frac{3}{7} = \frac{\quad}{\quad}$

15. $\frac{4}{9} = \frac{\quad}{\quad}$

16. $\frac{5}{6} = \frac{\quad}{\quad}$

Use factor of **6**

17. $\frac{2}{4} \overset{\quad}{=} \frac{\quad}{\quad}$

18. $\frac{3}{5} = \frac{\quad}{\quad}$

19. $\frac{1}{6} = \frac{\quad}{\quad}$

20. $\frac{7}{10} = \frac{\quad}{\quad}$

Use factor of **10**

21. $\frac{3}{4} = \frac{\quad}{\quad}$

22. $\frac{5}{6} = \frac{\quad}{\quad}$

23. $\frac{7}{8} = \frac{\quad}{\quad}$
