

THIS TIME THE LEFT
HAND FRACTION NEEDS
TO BE COMPLETED

Fractions

Complete Equivalent Fraction Pairs B

HINT SHEET!
Really think
about each one.

Example: $\frac{16}{11} = \frac{8}{22}$

As you saw on the video, find the factor that makes the equivalent fraction and complete the missing value.

What factor links the numerators?

Apply that to find the denominator.

CHALLENGE PROBLEMS

1. $\frac{6}{\quad} = \frac{18}{30}$

2. $\frac{3}{\quad} = \frac{12}{36}$

3. $\frac{4}{\quad} = \frac{24}{30}$

4. $\frac{4}{\quad} = \frac{28}{63}$

5. $\frac{6}{\quad} = \frac{42}{49}$

6. $\frac{3}{\quad} = \frac{24}{64}$

7. $\frac{7}{\quad} = \frac{56}{96}$

8. $\frac{9}{\quad} = \frac{45}{55}$

9. $\frac{12}{\quad} = \frac{36}{45}$

10. $\frac{15}{\quad} = \frac{45}{60}$

11. $\frac{35}{\quad} = \frac{70}{100}$

12. $\frac{28}{\quad} = \frac{56}{68}$

Problems 13-23: start at the right and multiply to the left!

13. $\frac{8}{\quad} = \frac{2}{5}$

14. $\frac{12}{\quad} = \frac{3}{8}$

15. $\frac{15}{\quad} = \frac{3}{4}$

16. $\frac{14}{\quad} = \frac{2}{7}$

17. $\frac{25}{\quad} = \frac{5}{8}$

18. $\frac{28}{\quad} = \frac{4}{7}$

19. $\frac{27}{\quad} = \frac{9}{10}$

20. $\frac{18}{\quad} = \frac{6}{11}$

21. $\frac{55}{\quad} = \frac{11}{12}$

22. $\frac{42}{\quad} = \frac{6}{10}$

23. $\frac{32}{\quad} = \frac{8}{9}$
