

NOW LET'S TRY  
DENOMINATORS  
OF 6 TO 10

# Fractions

Name: \_\_\_\_\_

Date: \_\_\_\_\_

## 4. Improper Fraction to Mixed Number B

Example:  $\frac{19}{7} = 2\frac{5}{7}$

Remember worksheet 4A,  
and what happens  
when there is  
no remainder!

1.  $\frac{17}{6} = 2\frac{5}{6}$

2.  $\frac{18}{7} = 2\frac{4}{7}$

3.  $\frac{35}{7} = 5$

4.  $\frac{27}{8} = 3\frac{3}{8}$

5.  $\frac{20}{9} = 2\frac{2}{9}$

6.  $\frac{100}{10} = 10$

7.  $\frac{35}{6} = 5\frac{5}{6}$

8.  $\frac{47}{7} = 6\frac{5}{7}$

9.  $\frac{41}{8} = 5\frac{1}{8}$

10.  $\frac{44}{9} = 4\frac{8}{9}$

11.  $\frac{59}{7} = 8\frac{3}{7}$

12.  $\frac{48}{8} = 6$

13.  $\frac{58}{9} = 6\frac{4}{9}$

14.  $\frac{52}{7} = 7\frac{3}{7}$

15.  $\frac{27}{10} = 2\frac{7}{10}$

16.  $\frac{49}{6} = 8\frac{1}{6}$

17.  $\frac{71}{8} = 8\frac{7}{8}$

18.  $\frac{65}{7} = 9\frac{2}{7}$

19.  $\frac{55}{6} = 9\frac{1}{6}$

20.  $\frac{93}{10} = 9\frac{3}{10}$

How about these?

21.  $\frac{21}{6} = 3\frac{3}{6} = 3\frac{1}{2}$

22.  $\frac{34}{8} = 4\frac{2}{8} = 4\frac{1}{4}$

23.  $\frac{75}{9} = 6\frac{3}{9} = 6\frac{1}{3}$

24.  $\frac{52}{10} = 5\frac{2}{10} = 5\frac{1}{5}$

these answers  
↓  
are  
simplified,  
shown in  
LOWEST  
TERMS.

If you  
can  
reduce,  
you  
must  
reduce.

But  
ALWAYS  
show  
your  
working.  
Like I  
did  
here.
