

Fractions

Name: _____

Date: _____

NOW TRY THESE!

1. Make Equivalent Fractions B

Example: $\frac{4}{5} \rightarrow$ Use single factor to multiply up numerator & denominator $\rightarrow \frac{4}{5} \overset{\times 2}{=} \frac{8}{10}$

Use factor of **2**

1. $\frac{1}{3} \overset{\times 2}{=} \frac{2}{6}$

2. $\frac{2}{10} \overset{\times 2}{=} \frac{4}{20}$

3. $\frac{4}{5} = \frac{8}{10}$

4. $\frac{3}{4} = \frac{6}{8}$

Use factor of **3**

5. $\frac{1}{2} \overset{\times 3}{=} \frac{3}{6}$

6. $\frac{2}{3} \overset{\times 3}{=} \frac{6}{9}$

7. $\frac{4}{7} = \frac{12}{21}$

8. $\frac{5}{10} = \frac{15}{30}$

Use factor of **5**

9. $\frac{1}{4} \overset{\times 5}{=} \frac{5}{20}$

10. $\frac{6}{8} \overset{\times 5}{=} \frac{30}{40}$

11. $\frac{2}{5} = \frac{10}{25}$

12. $\frac{3}{7} = \frac{15}{35}$

Use factor of **4**

13. $\frac{2}{5} \overset{\times 4}{=} \frac{8}{20}$

14. $\frac{3}{7} \overset{\times 4}{=} \frac{12}{28}$

15. $\frac{4}{9} = \frac{16}{36}$

16. $\frac{5}{6} = \frac{20}{24}$

Use factor of **6**

17. $\frac{2}{4} \overset{\times 6}{=} \frac{12}{24}$

18. $\frac{3}{5} \overset{\times 6}{=} \frac{18}{30}$

19. $\frac{1}{6} = \frac{6}{36}$

20. $\frac{7}{10} = \frac{42}{60}$

Use factor of **10**

21. $\frac{3}{4} = \frac{30}{40}$

22. $\frac{5}{6} = \frac{50}{60}$

23. $\frac{7}{8} = \frac{70}{80}$
